Calendar

Course	1.5h/w
Lab	1h/w
Project	1h/w

Total assisted activities	49h
Total individual study	76h

Organization

lab days (in-person) & project days (online)

Roughly alternate, may change if you all decide on dates, one week notice

Holiday: 14 April

Projects presentation: 26 May (all day)

Attendance policy

Course

In-person (on lab days) / online (on project days)

Lab

Always in-person!

Project

intermediate deadlines (online) + final presentation (in-person)

Grading

Lab	$30p$	$6 \text{ labs} \times 5p$
Project	$20p$	$5 \text{ deadlines} \times 2p + \text{final presentation } 10p$
Exam	$50p$	

Project

Language

SAS or python / matlab / programming language of your choice

Subject

May be on the subject of your dissertation research or different

Scope

Apply what you learn in the course/lab to your own research

Work at your own pace, but consistently

Present at least 2h work on each deadline

Project

Evaluation

Intermediate deadlines

- free discussion on what you did, Q&A with me and your colleagues
- no powerpoint presentation needed; can be draft notes, source code, figures, results tables

Final presentation

- structured presentation, slides
- emphasis on data issues, methodology, research questions

Next week

Initial discussion on project research topic and datasets

Briefly present the subject you are interested in and the dataset(s) you found.

If you do not know what subject to choose or can't find datasets, ask for help by Friday 28 February.
